

AquabupH with Nitrogen.... Specimen Label

Water Conditioning Adjuvant and Ammonium Sulfate Replacement

Ingredients

Active Ingredient: Blend of nonionic surfactant, phosphoric acid, sequestering Agent, and nitrogen.....	60%
Inert Ingredients:.....	40%
Total:.....	100%

CAUTION

Do not take internally. Avoid skin contact. May cause skin and eye irritation. Keep out of the reach of children. Read and follow all label directions and Cautions on all products used.

ANTIDOTE

If swallowed: Do not induce vomiting. Get medical attention. In case of skin contact, flush thoroughly with water.

CHARACTERISTICS

AquabupH is both a wetting agent and a buffering agent all in one product. It will safely lower pH as well as sequester minerals in the spray solution. AquabupH is an easy to use liquid. Surfactants in AquabupH are exempt from the requirements of tolerance under Title 40, CFR, 180.1001 (d).

DIRECTIONS FOR USE

With agriculture, aquatic, and industrial herbicides and pesticides: 1-2 quarts per 100 gallons lowers pH, buffers water, chelates iron, and sequesters hard minerals like calcium and magnesium salts. AquabupH promotes uptake and is a great wetting agent. The nitrogen enhances the uptake of herbicides.

CONDITIONS FOR SALE

We warrant that this product conforms to the chemical description on the label and is reasonably fit for the purposes set forth on the label when used according to directions under normal use conditions. There are no other warranties, whether expressed or implied, including a warranty Of fitness for a particular purpose. This warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions not reasonably foreseeable to seller, and buyer assumes all risk of any such use.
